

Senior UX Designer

Platform Tenents

Maersk is achieving an unprecedented transformation in the growth of our businesses, rethinking the way we engage with customers and partners, and how the world's trade flows across our global network. Our software and technology are center stage in creating value for our business and our customers. We are looking for a Confident Senior UX designer whose years of experience with design research, wireframing, prototyping, and final design will enable them to make a difference in our business.

As a Senior UX Designer, you work across the design cycle, by generating a detailed understanding of user needs, creating conceptual and detailed designs, and validating them.

We offer

We offer an exciting and attractive career in an ambitious and competitive environment, with the possibility of continuous professional and personal development.

We believe that compensation should be above the market average for above-average performance, and accordingly promote a transparent, logical and consistent compensation strategy that clearly links performance and reward.

General working hours are 37 hours a week excluding lunch. As part of ensuring a successful work-life balance we promote flexible work-hours and the possibility to work from home when at all possible taking both the employee's and the company's interests into consideration.

All full-time employees are entitled to participate in a competitive pension scheme and are covered 24 hours a day by accident insurance.

With market leading parental, maternity, paternity as part of our benefits, we can truly offer you a holistic package!

Key responsibilities

Your daily work includes working on several applications within the Maersk.com Platform. Together with a cross-disciplinary team of Product Owners, UI Developers, and Software Engineers, you'll work to create the necessary applications for optimizing the network and transporting the cargo. You are responsible for the research, design, and validation, but also play a crucial part in challenging and refining the scope and functionality of the applications.

You will work closely with fellow UX designers to ensure consistency across the applications in the platform, and we want you to provide and solicit feedback on the designs.

In short, we are looking for someone who wants to:

- Make conceptual ideas and refine them into a useful and valuable product experience.
- Collaborate with Product Owners, Engineers, and other partners to craft intuitive, cohesive, and delightful experiences from product conception to launch.
- Develop site maps, user flows, wireframes, mock-ups, and production-ready specs. You will be responsible for the entire design process for your team.
- Collaborate with the rest of the design community within Maersk to ensure a consistent and cohesive experience across Maersk products.
- Provide and solicit feedback from other designers to continually raise the bar of quality.
- Contribute actively in the evolution of Maersk's design system.
- Promote Design Thinking and a user centric design approach.
- Identify user research needs and conduct usability tests.

We are looking for

To do this job, we imagine you have the following qualifications:

- Education in HCI, Product Design, or a related field with a number of years of experience with desktop experiences, product-, interaction-, and information design.
- Familiarity with design software like Sketch, Axure, and Figma – we primarily use Figma.
- A strong and clean visual design sense.

- Experience working in an agile development process and/or Iterative UX environment – and an environment that is undergoing large change.
- Excellent problem-solving skills and an analytical mindset
- Ability to work independently with stakeholders while liaising and reviewing with fellow designers
- Proven ability to collaborate and to communicate ideas and design rationale – verbally and written.
- Experience working with Enterprise UX is a plus.
- Experience working with design systems is a plus.

Please note we are looking for an experienced UX designer who can present solid arguments for their work and be able to 'convince' stakeholders on the best way forward. This is a superb opportunity for a seasoned and confident designer!

If you are interested, please send an application, including resumé and a portfolio demonstrating real-life experience with a full spectrum of design thinking, visual, and interaction design experience.

For further information, please contact: Amanda Huckerby - (amanda.huckerby@maersk.com).

Last application date: **30/9/2021**.
